PROFESSIONAL SUMMARY

Full stack web developer with 2+ years of experience building production websites and web applications end to end: frontend, REST APIs, databases, and Linux VPS deployment. Daily stack includes React, Next.js, Node.js, Express, MongoDB, MySQL, PHP, and WordPress. Delivered major products such as an office management system, a custom e-commerce store with payments, an event registration platform, and a recruitment portal. Also builds AI automation and WhatsApp automation using n8n, Zapier, or custom software.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS

Backend: Node.js, Express, REST APIs, PHP

Databases: MongoDB, MySQL

CMS / DevOps: WordPress, Git, GitHub, Linux, VPS server management, deployment

Automation: n8n, Zapier, AI automation, WhatsApp automation

Other: JWT, RBAC, Razorpay, PDF generation, Excel export

PROFESSIONAL EXPERIENCE

Web Developer | OSFORH Software Solutions | Feb 2026 - Present

- Build and maintain production web modules across frontend and backend for client and internal product work.
- Ship features for a live job portal platform, keeping releases stable for users and admins.
- Handle bug fixes, UI improvements, and deployment readiness from development to live environments.

Web Developer | First Reach Digital | Sep 2024 - Dec 2025

- Delivered responsive marketing and business websites for digital campaigns and client brands.
- Translated design direction into maintainable HTML, CSS, and JavaScript.
- Supported project delivery timelines for digital marketing and web engagements.

Web Developer | Iberr Technologies LLP | May 2024 - Jul 2024

- Implemented client-facing web features and page experiences with clean, usable interaction.
- Improved readability, spacing, and mobile behavior across key screens.
- Turned team feedback into production-ready frontend updates.

Full-stack Developer | Bixel Technolab, Malappuram | Dec 2022 - Mar 2024

- Built full-stack MERN features using React, Node.js, Express, and MongoDB.
- Modeled and queried application data for real product flows.
- Practiced Git, debugging, and iterative delivery on team projects.

MAJOR PROJECTS

ACMMO Office Management System | Full-stack Developer

Next.js, React, TypeScript, MySQL, Tailwind CSS | Production system

- Built an end-to-end office platform for architecture operations: clients, departmental workflow, billing, dual finance ledgers, GPS attendance, and printable invoices.
- Implemented RBAC portals for admin, office manager, billing staff, and department staff, plus admin review gates between departments.
- Developed invoicing, project P&L, office cash book, GPS geofence attendance, PDF/Excel exports, and audit logs.

CASEBOX | Full-stack Developer | caseboxstore.com

React, Node.js, Express, MongoDB, Fabric.js, Razorpay, JWT | Live

- Shipped a custom phone-case e-commerce store with a live canvas designer, Indian checkout, and admin order management.
- Built a Fabric.js designer tied to real phone models, camera cutouts, and print-ready overlays.
- Integrated Razorpay and UPI payments with server-side verification, Google sign-in, catalog admin, order tracking, and promo codes.

Malayali Media Kalolsavam 2026 | Full-stack Developer | malayalimediakalolsavam.com

Next.js, React, Tailwind CSS | Live event platform

- Delivered a full-stack festival platform for individual and company registration, competition entry, online payments, and organizer admin.
- Built participant records, chest numbers, company/branch team flows, authentication, email notifications, and an admin dashboard.
- Handled deployment, production setup, testing, and live maintenance.

ONEMYJOB | Web Developer | onemyjob.com

Recruitment platform | Live

- Contributed to a Dubai-based recruitment platform connecting candidates, companies, and agencies through competitive bidding.
- Worked on role-based portals, CV/video profiles, bidding workflow, and notifications via WhatsApp, SMS, and email.

Creative360 | Web Developer

Internal operations application

- Built a company workspace for task management, employee records, and document filing in one place.
- Added owner, due date, department, priority, and status queues (to do, in progress, completed) so work is not tracked across chat and spreadsheets.

Additional client work: 100+ websites across education, ecommerce, news, and business (WordPress, Next.js, PHP, etc.).

EDUCATION

Bachelor's Degree in Computer Science | IGNOU, New Delhi | 2022 - 2024

Coursework in programming, databases, software engineering, and systems, applied on real web projects with HTML, CSS, JavaScript, and the MERN stack.
